BRAIN offers the full scope of biobased solutions

BRAIN is a pioneer of industrial biotechnology. We create innovative solutions applying a world class biotechnology portfolio to our BioArchive, a proprietary repository of natural compounds. Focused on delivering solutions to our customers' application needs we deliver value from concept to commercialization and beyond.

Consolidated capabilities

The BRAIN Group provides first-class **research and development work, specialized production expertise and access to attractive markets.** All companies interact to synergize in R&D and production.

Driving sustainable innovation

With its wide range of biobased ingredients and processes, BRAIN makes a significant contribution to **making consumer goods more effective and healthier**, and to **making industrial processes more efficient and sustainable.**

Value from concept to commercialization

Thanks to powerfully combining our BioArchive with our world class biotechnology portfolio, we develop and market bioactive natural products, tailor-made enzymes and high-performance microorganisms. Our focus is on markets in the field of Nutrition & Health, Skin Care and Industrial BioSolutions. We distribute and commercialize our products through direct sales, propriety product developments and alliances with industrial partners.

Team up with BRAIN to advance your products and processes

Our products

Based on both natural biodiversity and our BioArchive alike, we focus on three product categories for highly diverse applications – **customized enzymes, bioactive natural compounds and high-performance microorganisms.**

We offer a **portfolio of more than 100 specialty B2B products.** This portfolio is constantly fueled by project realizations from our New Product Development pipeline.

Our solutions

BRAIN applies a **world class biotechnology portfolio to a unique proprietary BioArchive.** Our excellence is based on the powerful combination of our proprietary resources and enabling technologies across our group companies. Our activities are driven by a **solution focused creative mindset which overcomes single technology limitations.**

We offer **joint development of customer-specific solutions and exclusive R&D partnerships** and can look back on more than 100 successful joint R&D projects with major international companies.

Healthier food and natural product preservation

BRAIN's **Nutrition & Health** unit helps customers worldwide to:

- **make food healthier** by reducing sugar or salt while retaining sweetness or savour
- **make food tastier** more efficiently by creating and enhancing natural flavours or masking off-tastes
- **maintain gut health** by providing functional probiotics, avoiding antibiotics
- **reduce the perishability** of foodstuffs thanks to the use of natural bioactive anti-microbials

Biobased skin and wound care

BRAIN's **Skin Care** unit provides natural and bioactive solutions, helping customers worldwide to:

- **identify novel product ingredients** by applying tailor-made technologies to our extraordinary collection of biological resources derived from nature's biodiversity
- **deliver target-oriented solutions** in line with specific needs and product portfolios by adapting our outstanding in-house test methods

Sustainable processes for a circular economy

BRAIN's **Industrial BioSolutions** unit provides support to our customers when it comes to:

- innovating in order to **improve production time efficiency**
- **reducing their CO₂ emissions** and energy consumption
- **transforming waste-streams** into products for unprecedented value chains

Our strengths – your benefit

Strong partnerships

At BRAIN we understand that the key to successful innovation and commercial success is the right partnership model.

World class biotech portfolio

Our world class biotech portfolio and experience allows us to focus on the challenges that we and our partners face.

Industry-leading BioArchive

The BRAIN Group's proprietary BioArchive offers access to an immense variety of biological solutions.

Impressive track record

BRAIN can look back on more than 100 joint R&D projects successfully completed in cooperation with major international companies.

Get in touch with BRAIN

You want to find the right product for your needs, learn more about our product innovations or join in on an R&D partnership? Contact us today. We will find the right approach matching your need.
